Preface

THIS is the third annual issue of the Greater New York edition of **PRINTING TRADES BLUE BOOK**, and with a genuine feeling of deep appreciation for the helpfulness we have had in its preparation and publication, we take pleasure in dedicating it to the Printing Trade and its Allied Trades.

As heretofore it is distributed into every printing plant in Greater New York and all cities and towns in adjacent territory.

The publication of this book is made possible only because of the generous co-operation it receives from its advertising patrons, and to this vast number of well-wishers and friends we extend our hearty gratitude for the liberal manner in which they have helped us. In supporting us in our undertaking they all have done their part in helping the craft as a whole.

The names of these advertisers will be found in alphabetical order in the Index to Advertisers; and also in the Classified Directory section, where accurate telephone numbers of each is given as well as their addresses and the various lines and supplies they handle, and the special service rendered by some of them to the trade. It is hoped by the publisher that those who receive a copy of this book will use it to the advantage of these advertisers.

With added thanks for aid given us by individuals and through the trade organizations, we beg to subscribe ourselves.

Cordially yours,

THE PUBLISHERS.

Greater Speed

DURING thirty-five years as press manufacturers, we have kept pace with the demand for increased speed of production. Many prospective purchasers judge the output capacity of the present models of "Laureate" and "Colt's" Presses by those of several decades ago. Such a judgment may prove as detrimental to the negotiator as to us. Productive capacity, *as to quantity, quality and profit*, does not result solely from a high rate of impressions per minute. Thus, a mechanic, who makes many movements where one would suffice, is like a fly persistently dancing on a hot plate—gets nowhere!

The fact that many of the most successful printers have standardized their plants by the exclusive use of "Laureate" and "Colt's" Platens, all of uniform size and frequently interchangeable from one job to another, would seem to be worth your while to consider; for such has not come about by mere chance.

H.P. ANDREWS PAPER COMPANY

INTERTYPE

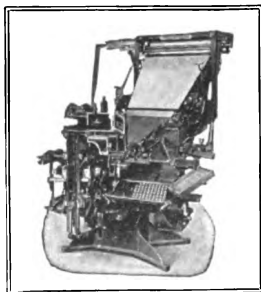

“The BETTER Machine”

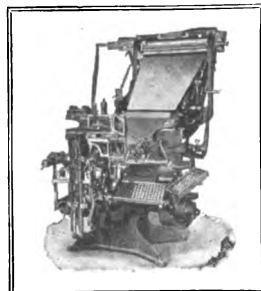

Model A—One Magazine

Side Magazine Unit

Model B—Two Magazines

Model C—Three Magazines

Standardized

A Model A can at any time be converted into a Model B or C, or a Model B into a Model C, quickly and inexpensively. The Standardized Side Magazine Unit can be applied to any model at any time.

Simplified

All models are as simple as ingenious experts can make them. Model C has, in one mechanism alone, 910 fewer parts than similar machines of other manufacture.

The Warnock

Diagonal Block and Register Hook System
means all that the words

Economy and Efficiency

imply, and are in use in thousands of print
shops throughout the country

Any User Is Our Reference

This system, combined with our Sterling
Expansionable Aluminum Book Block and
Sterling Small Sectional System in Aluminum
or Cast-Iron, will

Eliminate Your Troubles

Reduce your make-ready and register time
and make you real money. They have been
tried out by many of our most prominent and
prosperous printers and have proven to be

The Most Flexible

Durable and Profitable Plate-Mounting De-
vices on the market.

 Lino—Mono—Inter—Stereo—Job Type Metals*

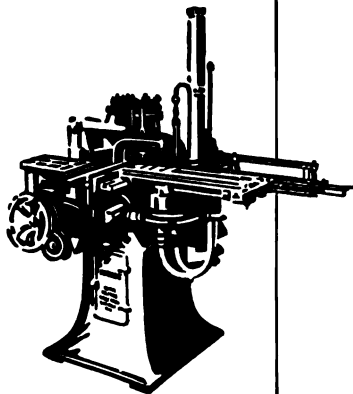

The MONOTYPE Ensures ECONOMY and EFFICIENCY

In the composing-room by handling every class of composition that can be done by hand, and more, efficiently, and at reduced cost of production, proving the ideal machine is the

Mono- type

It also provides all material needed by the hand comps, so economically that it costs less to melt the used material and recast than to distribute. Thus the Monotype created the Non-Distribution System that eliminates the non-productive time and makes every compositor continuously productive.

*It Gives the Maximum of Profits at the
Minimum of Cost*

YOU CAN WORK MIRACLES WITH

“MIR-A-KEL”

(TRADE-MARK)

INK COMPOUND

NO MORE OFFSET

It is the only reliable preventive of OFFSET, and positively acts against the sticking together of sheets in the process of printing.

“MIR - A - KEL”

is a guaranteed compound

It has been thoroughly tested and in every respect it fulfills the requirements it is intended for. It does not interfere with the original color or shade of any ink. To the contrary it really intensifies color and helps any color ink to lay more smoothly.

“MIR - A - KEL”

WILL NOT reduce the body of any ink. It will not fill up the screen of the finest half-tone. It will not dry up the ink on rollers, form or ink plate.

“MIR-A-KEL” saves money for its user because it guarantees clean printing, free from off-set and makes unnecessary the need for slip-sheeting.

Send for a liberal sample FREE. To try “MIR-A-KEL” means you will be a constant user.

ANNOUNCING THE NEW COLOR CHAMPAGNE

We are pleased to announce the addition of this new shade to the Old Hampshire Bond line. Hampshire colors have long been favorably known for their richness and brilliancy, and now comes this latest member of the family to equal, if it can, the splendid record of the older brothers. May we bespeak your consideration for it.

PERFECTION is attained by having the essentials right, and ever after taking infinite pains in regards to details. As to the first, we developed, and made the duplication by the lead process a practical proposition. As to the second, competent observers state that the outstanding feature is the unique care bestowed on details. Just as we have perfected our product, so we have perfected our methods. Perfect courtesy, fairness, promptness, and intelligence, or as near them as the human in us will allow, are at the root of our popularity.

Half Tone and Electro File
In Golden, Natural or Weathered Oak,
Freight Paid at

\$38

See Note

Filing Suggestions is free booklet outlining simple but effective methods of filing correspondence, catalogs, etc. Ask for your copy as well as catalog of Filing Devices and Supplies. If you are in position to stock our goods for resale, you want our dealer's proposition.

Note.—At prices noted, we pay the freight to points in Eastern and Central States. Slightly higher in West and South. Get dealer's name and delivered prices on our goods.

The Weis Manufacturing Co.
222 Union Street - Monroe, Michigan
New York Office: 368 Broadway

Keep an Accurate Record of Your Printing Plates

Doing so will save many a dollar and many an argument. The satisfaction that accrues from having a positive record of your own and your customer's valuable cuts is well worth the investment necessary to procure a

Weis Filing Device

for this purpose. Cabinet illustrated here is our No. 4258, contains 21 drawers each $1\frac{1}{4} \times 11 \times 22$ inches inside, with a filing capacity of 5800 square inches. Drawer bottoms are three-ply veneer and will not warp or sag under weight of contents. Height is 52 inches. Costs less than type stand equipped with cut drawers. Initial purchase of a cabinet for this purpose should have a 4×6 card filing drawer at top to keep cut records. If you are interested, write us for complete information.

Weis Flat Top Desk with Filing Drawers

Keeps printing executive's important correspondence and records at finger tips. A wide assortment of

drawers designed for the filing of all standard sizes of business papers and record cards enables you to secure a desk arranged for your particular needs. Desk shown here is our popular No. 999, furnished in Plain Oak, Golden, Natural or Weathered finish at

THE "PRINTER'S" SAW

Size of Table, 24 x 26 inches.

Standard at base, 18 inches diameter.

No fair-sized printing plant can afford to be *without* the "Printer's" Saw.

It saws out all the small bills you pay your electrotypewriter each month and saves inestimable time when on your own premises.

It is built solidly throughout and is equipped with saw blades for metal and wood cutting, and motor pulley.

NEW YORK MONOTYPE COMPOSITION COMPANY, Inc.

There Is An Expert Paper Man Near You

In every important advertising center you will find a Seaman Paper Co. office. The representatives there are men who know the "ins" and "outs" of the manufacture and proper uses of paper.

No matter whether your requirements are for 5,000,000 catalogues or 500 envelope stuffers you will receive the same painstaking attention.

You will make no mistake when you turn your paper requirements over to the Seaman Paper Co. They are the exclusive agents for some of the biggest mills on the continent—they control vast sources of supply, and they know the meaning of service. That is why they are what they are—the fastest growing paper concern in the country.

OUR service to the trade helps printers to develop a distinct and profitable department without any expenditure for equipment. From samples supplied by us without charge, the printer takes his orders, and with our wonderful facilities we turn out the work promptly, efficiently and with our standing guarantee of satisfaction to all concerned in the transaction.

Our prices are low—commensurate with what is expected of us by our clients and the class of work we do.

DURING WAR TIMES

EVERY dollar must be made to count, and to make them count every printer knows he must find ways and means of cutting down expenses.

It is admitted that the composing room is the most expensive department in the print shop and offers more opportunities for conservation than any other department.

You can save real money by letting us handle your composition and make-up.

We operate the largest and best equipped Trade Composing Room in New York City, and a net increase in sales of over 31% during the past year makes it obvious that the printers of this city are realizing the advantages of trade composition.

Six Monotypes, two Linotypes and thirty hand compositors, working day and night, offer you a service that cannot be equalled in any print shop. Try it and watch the dollars count up.

Our new and complete Specimen Book of Type Faces ready February 1st, 1918.

Attention, Men!

Fall in line and get the up-to-date manual of the printing trade—

The American Printer

You cannot help but go forward if you read this magazine, because it is made up of the best features of six big-bore trade journals all assembled in one. It's columns are right and loaded with high-calibre articles, rapid-fire news items, dressed up with good illustrations and flanked by advertisements of the highest ranking supply houses.

It will hold your attention and keep you abreast of the latest ideas and news of the day.

Don't skirmish around but send in a general order in double-quick time and get a curtain-fire of twenty-four numbers for \$3.00; Canadians, \$3.50; other allies, \$4.00.

The Oswald Publishing Company has also a complete arsenal of technical books for practically all divisions of the printing and associated industries, and a catalog and enlistment blanks will be sent on request.

RULES, LEADS, SLUGS, BORDERS In STRIPS or Cut to Measure
NEW YORK MONOTYPE COMPOSITION CO., Inc., 461 EIGHTH AVENUE

Stonemetz
Two-Revolution

Increase Production 200%

THE following production records were both made in the same office—a STONEMETZ PONY and TWO AUTOMATICS running on the same job:

STONEMETZ PONY

2,000 impressions per hour with 12 up equals
24,000 circulars per hour. At \$2.00 per
hour, each M cost 8 1-3 cents or 100,000
for.....\$8.33

TWO AUTOMATICS

2,000 impressions per hour each machine with
2 up equals 8,000 circulars per hour. At
\$2.00 per hour (\$1.00 each machine) each
M cost 25 cents or 100,000 for...\$25.00

(Customer furnished all plates. If necessary to buy plates, the Stonemetz would still have Automatics beat by 25 per cent—\$22.93 against \$30.12—would turn out the job in one-third the time and *do better work.*)

¶ More impressions per hour and low cost of operation—these are the STONEMETZ PONY arguments for the printer to consider. Our New York representative will be glad to call upon you and show you why the STONEMETZ is the *best press* and the *logical press* for you to buy. Drop him a line or 'phone him to-day.

Challenge Patent Blocks

THE growth of color in advertising necessitates up-to-date plate-mounting equipment. Unless you are equipped with the latest and best, you cannot *profitably* produce high-grade color work. This is proved by the experience of the biggest printers.

¶ Results demonstrate the tremendous value of color in advertising. A Chicago mail order house recently printed two catalogs identical in every way except that one was plain black and white and the other in colors. The color catalog produced fifteen times as many returns.

¶ You printers should make it your business to sell more color work. It means more presswork for you and bigger returns for your customers. And it is easier to sell one two- or three-color job than to sell two or three one-color jobs.

¶ CHALLENGE EXPANSION and SIMPLEX PLATE-MOUNTING and REGISTERING SYSTEMS will enable you to go after the kind of printing jobs that mean the biggest profits. Write or 'phone our New York representative. He will be glad to call upon you.

You Can't Get Away From It!

PAPER is unquestionably the vitally important factor of many orders.

The difference between a profit and loss on some order may only mean 'phoning Greeley 1812* (Uptown) or Beekman 3235* (Downtown).

Everything in paper and kindred lines.

Let's prove to you that

*"If you want what you want when
you want it—you've got to give
your orders to BEEKMAN!"*

is not merely a slogan.

Two complete establishments dedicated to
your service!

Printing Machinery, Type and Materials

We carry a large stock of printing machinery, type and miscellaneous materials, and it is to the advantage of every printer to secure our prices and discounts, which will prove to him that we can save him money on his purchases, and, at the same time, supply him the very best quality of goods.

We have the only manufacturing plant in New York City making leads, slugs, metal furniture, brass rules, galleys, reglet, furniture, and other goods too numerous to mention, and are, therefore, in a position to guarantee prompt service.

We carry a large stock of Standard Line, Point Set Type, guaranteed to be of the best quality obtainable at a much greater discount than given by any other manufacturer.

The Miller Saw-Trimmer

Is a combination of 12 high-speed, quick-acting, precision-cutting tools, designed especially for modern print shop requirements.

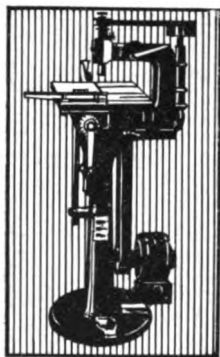

Takes care of all the sawing, trimming, beveling, mortising, routing, drilling, jig-sawing, broaching, type-high planing.

It is purely an extra profit machine. You cannot run a modern shop efficiently without it.

Lakeside "Electric" Case Rounder

Far superior to the old method of rounding by steam pipes. This heater has five sizes of tubes, taking care of practically all standard covers. Tubes Nos. 1 and 2 are reversible, making sizes 9-16 inch and 1 inch on No. 1, 11-16 inch and 1 1/4 inch on No. 2, Tube No. 3 is 1 3/4 inch. Special sizes made to order. Standard machine 10x33 ins. and 7 ins. high. Price \$57.50 F. O. B. Chicago.

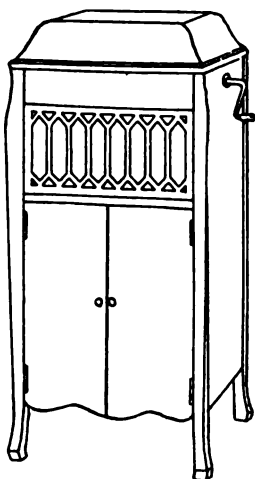

LAKE SIDE SUPPLY COMPANY, Inc.

(Member Chicago Association of Commerce)

202 So. Clark St.

Phone Harrison 3840

Chicago, Illinois

Cabinet dimensions, 50 in. high, 23 in. deep, 21 1/4 in. wide. Fitted with 7 album shelves.

Special Offer

To Readers of the Blue Book

\$50.00 Saved

Automatic Stop Free

This beautiful "LAKE SIDE" Phonograph, in either solid mahogany, golden or finished oak, with tone arm arranged for playing any disc records, Victor, Columbia, Pathe and Edison, is offered to the readers of the Blue Book at a saving of \$50.00, and in addition we will install free of charge an automatic stop which shuts off the motor at the end of each record. It has a motor equal to and better than most \$200.00 machines.

The horn is made up of all-wood construction, allowing for a large volume of sound, yet clear and mellow. The machine is fitted with a Tone Modulator, allowing for adjustment from loud to very soft tones, at the option of the operator. Reproducer of highest tone quality with best mica diaphragm.

Machine is equipped with balanced Dome Support, which automatically holds the Dome where it is put, and requires no unhooking to release it. We offer this machine at the low price of \$100.00—at least \$50.00 less than what others are asking for machines of this class. Write or call today for complete information. Mention this advertisement.

A. C. - MOTORS - D. C.

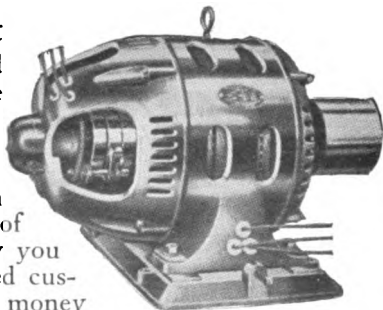

Electro Dynamic Interpole Motors

Direct Current
Interpole sparkless motors provide the highest possible efficiency in driving printing machinery in the metropolitan districts of large cities. They are now being specified by the most successful printers and publishers. Let us tell you who are using Electro Dynamic drives.

Alternating Current

Slip Ring variable speed motors of this type have proven their superiority for printing press drive in alternating current districts, which are usually in small towns and suburbs of large cities. Let us show you some of our many satisfied customers. We can save you money in both first and second cost.

Mechanical Appliance Watson Motors

Complete Equipments

With the Cutler-Hammer Mfg. Co.'s appliances in connection with these two first class motors we are prepared to give true efficiency throughout in taking over your contract for complete equipments, and installation of same.

Our printing machinery experts will call at your request.

Why More Printers Are Selling *Better* Printing

LIVE printers, today, are going after business on a better basis than ever before.

They are thinking more about their customers' needs—making it easier for printing buyers to choose. The result is that printers, all along the line, are turning out better printing and getting better prices for it.

Naturally, the increasing number of high grade booklets, folders, circulars and catalogs is putting competition on a keener basis.

It takes a mighty good dummy to land a job these days—and nobody knows it better than printers themselves.

Perhaps the biggest single reason for the rapid increase in our business is the fact that we *work with the printer*.

Every day, for example, printers call on us to lay out booklets, catalogs and circulars *complete*.

This means that we read the copy, get the idea—and then lay out the book in the spirit in which it is written and with an eye to its effect on the reader.

As one printer expressed it—"Your service cuts out the guess-work for me. I get the job out quicker and it looks better. And it is making my business grow faster."

If this kind of service interests you, telephone Barclay 7728 for a representative.

To the Trade

When stock is so costly it is a sin to spoil
it with poor work and to humiliate this
new art by a poor product or
placing its selling price
in the slough of
despond

We were the pioneers in Cameo Embossing
and have been close students of this
branch of the trade

This is the age of specialization and it is
good business to have this work
done by one who takes pride
in nice work

SUCCESS BOND
H.P. ANDREWS PAPER COMPANY
104 WORTH STREET

Made in U.S.A. Inks

When the war began the color market became restricted. The Ault & Wiborg Company immediately erected factories of their own for the purpose of manufacturing Dyes and Dry Colors, and have been successful in meeting the requirements of the domestic trade. This is a service that is being greatly appreciated by our customers.

Surely, with the firm back of you, pressroom troubles can be reduced to a minimum. Not only our salesmen but also our chemists will co-operate with you in inaugurating a service that will not only meet your requirements, but will also make you consider us a part of your own organization, the resulting service being to our mutual advantage.

We sincerely urge a trial of our "Made in America" Inks and assure of our hearty co-operation.

The burner with the "punch" to give the *blue flame* that produces results. It is guaranteed to the limit for Sanitation, Gas Economy, Efficiency and convenience—the *four last words in burners*.

Every burner *stays sold*—that proves they are *right*. No excuse for trouble or faulty work—any longer. This burner is standard equipment the year round, and it should have a place in your plant.

It banishes the "grouch" from your pressroom.

As a time and money saver it's a "War Bride."

We have literature that tells all about it—Don't you want it?

Gold Seal Metallic Ink

Insures perfect coating, permanent lustre and sharp impressions, no matter whether you run solids or fine line work.

Eliminates all usual disadvantages. Will not roll up on the press, needs no experts in handling work and free from offensive odors.

**Dries on the Paper
But Not on the Press**

Trial orders solicited, or proofing sample sent on request. If you have any problems in gold or silver printing, write us. We can help you.

Metal Cutting Sticks

Valuable in Economy and Improvement

The COMBINATION METAL CUTTING STICK is composed of Metal of which Aluminum is the main ingredient. It comes in two parts: (1) The Case, which is made of cold rolled steel; (2) the Strip, which is the part cut upon, of soft white metal. The Case will outlive any Cutting Machine, while the Strip gives the service of from **fifteen to twenty wooden sticks**. It produces a clean cut upon the bottom sheet, does not blacken or soil them in any way, and preserves the knives.

None Genuine without This Label

own conditions, on your own work, and if it does not do all that we say, return the pail and we will cancel all your obligations.

PRATT ANTI-OFFSET CO., 1059 Willis Ave., East Detroit, Mich.

It eliminates offset or smut—it *tones* ink colors and makes them print clean and sharp—it brings out every detail of half-tones and other cuts—invaluable for lithographers and offset printers—it sets ink very quickly, which enables jobs to be handled in less time—it more than pays for its use by cutting ink bills and reducing the cost of handling jobs.

To prove its value to you we will send any responsible firm a 5-pound pail. Try it in your own shop under your own conditions, on your own work, and if it does not do all that we say, return the pail and we will cancel all your obligations. *Send for a trial pail, today. It's very inexpensive.*

USED
BY
THE
BEST

The
VANDERCOOK
Proof Presses

The majority of publications, national in circulation, now use the Vandercook Presses.

The recognized leaders in commercial, book and catalogue printing have found Vandercook Proof Presses the most scientific and simple in construction, the most productive in work, the lowest in upkeep, the fairest in price — the best to buy.

The merit of Vandercook Presses is now so well established that purchasers do not have to pay for dealers' serv-

ices or middlemen's profits.

Vandercook Presses are sold direct from factory to user.

There are imitators—of course—but it is better to buy a genuine up-to-date Vandercook Press now, than later wish you had—profit by the mistakes of others. We can tell you of good printers who "fell for" energetic solicitors for imitation machines before they learned of the possibilities of genuine Vandercook Presses.

MADE AND SOLD ONLY BY

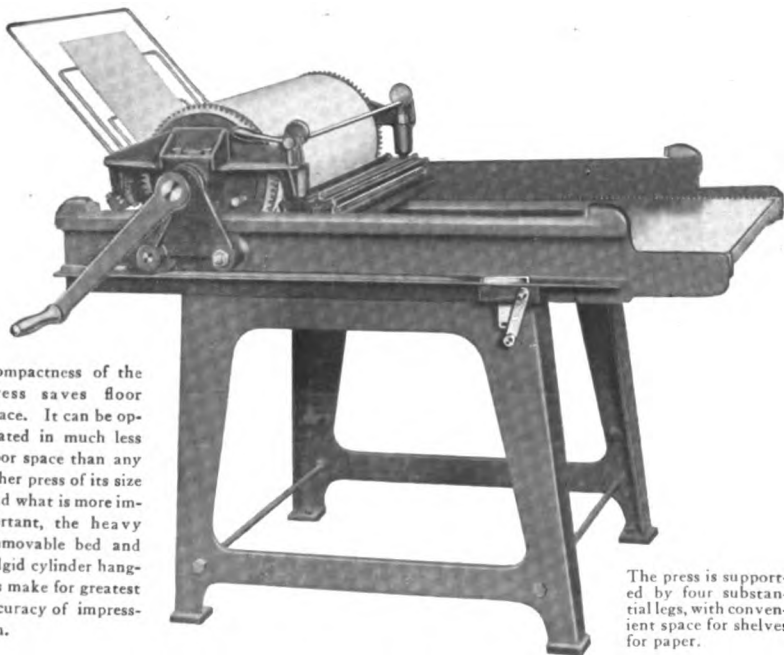

THE VANDERCOOK PRESS

Creator and Developer of the
MODERN PROOF PRESS

550-565 West Lake Street

CHICAGO

Vandercook Composing Room Cylinder

Compactness of the press saves floor space. It can be operated in much less floor space than any other press of its size and what is more important, the heavy immovable bed and rigid cylinder hangers make for greatest accuracy of impression.

The press is supported by four substantial legs, with convenient space for shelves for paper.

SIZES AND PRICES

No.	Printing Surface	Floor Space Over All	Approximate Shipping Weight	Price
17	17 x 25	40 x 60	1100 lbs.	\$295.00
25	25 x 25	48 x 60	1450 lbs.	385.00

It is the only press for the larger composing rooms where **QUALITY** is the first desideratum and ease and speed of operation, on both large and small forms, very essential.

Vandercook Presses are the only composing room presses on which automatic inking is done well enough to meet the demands of the highest grade printing.

It will print from one galley or as many galleys as can be put on the large bed.

It will ink and print a single letter or the largest form without any change of adjustments

Practiced operators, feeding the press to grippers, operate the press at the rate of fifteen to eighteen copies a minute.

Vandercook Roller Series Press

The No. 15 and No. 20 are the same except that the No. 15 is furnished without inking attachment.

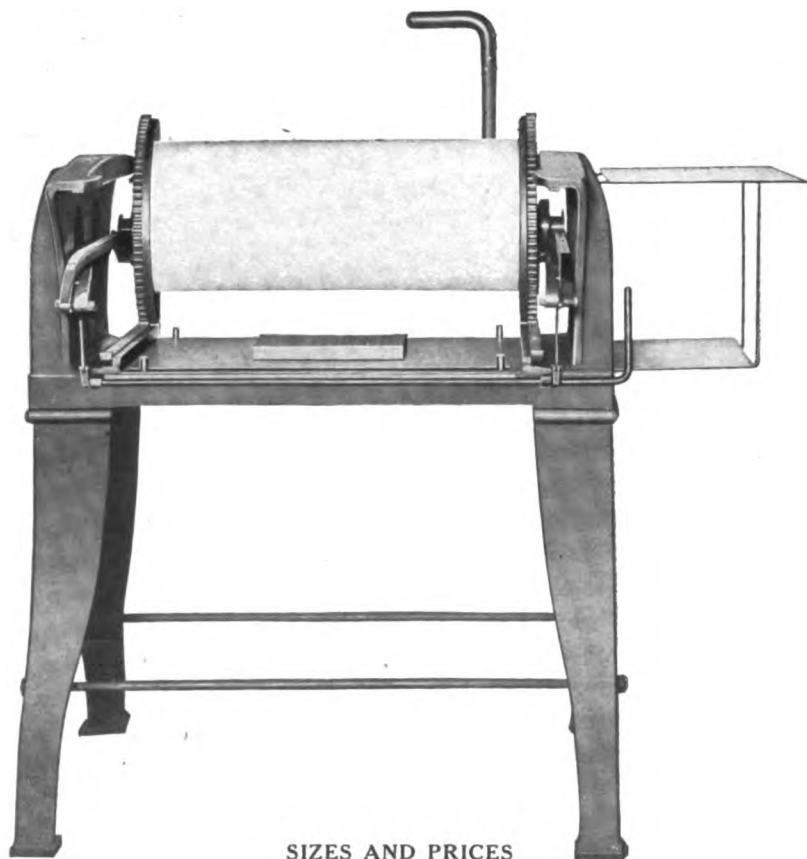

SIZES AND PRICES

No.	Actual Printing Surface	Floor Space Over All	Approximate Shipping Weight	Price
15	12 x 25	22 x 48	550 lbs.	\$125.00
20	10 x 25	22 x 48	500 lbs.	185.00

Is rapidly supplanting in progressive shops the slow and ruinous felt blanket gravity proof presses. It will produce three times the volume and an infinitely better quality of work. It will print and

ink a fine halftone, a single unsupported letter or a form the full capacity of the press without any change of tympan or impression regulation, or change in the inking system.

Vandercook Rocker Series Press

SIZES AND PRICES

No.	Actual Printing Surface	Floor Space Over All	Approximate Shipping Weight	Price
1	12 x 18	38 x 42	500 lbs.	\$165.00
5	11 x 25	38 x 48	700 lbs.	187.00
10	17 x 25	44 x 48	800 lbs.	220.00

The simplest, strongest and most rapid hand inking printing press ever built. It is unusual in appearance and is a radical departure from all other printing press construction. The results in quality and speed that a practical operator can get

from this machine are almost unbelievable until you see it in operation, operated by a boy who knows how. We can show you that the Rocker Series Press is now the safest, strongest, and most speedy hand inking press ever built.

52	6825	3413	1707	1138	854	569							821

The paper necessary for any given job may be readily and surely determined by consulting the above table. For example, 24 pages can be printed on one side of a sheet of paper, the paper necessary for 1000 copies of a 100 page book will be 2188 sheets, and if the book should be 195 pages, you add the 2100 additional sheets, making the total 4288 sheets.

Figuring paper in the usual way, a book of 196 pages has 4 full sheets and a fraction of one-twelfth, 4084 sheets, and adding 5 per cent. brings the same result, 4288. The table saves time and figuring and avoids possible mistakes.

(This table gives number of ems to running inch in eight sizes of type, in columns 16 to 30 picas wide.)

Imposition of Forms

The make-up should learn to use the measuring rule or tape measure and dividers. They are more convenient to measure with than paper, and their use is regarded as evidence of knowledge of the imposition of book forms. The dividers will enable the make-up to verify his measurements quickly. Printers' dividers cost 85 cents.

Ascertain what furniture will be required for the margins of a book form before placing it upon the stone. Time will be saved, and the work will have the appearance of order and neatness.

After a book form is imposed, tighten the quoins, and ascertain by means of a straight-edge or square if the pages are of equal length and the head lines or bottom folios are exactly in line. The folios are usually the guides for hand-folding and should receive great attention, otherwise the binder will not secure good register. For the same reason, folios should all be set exactly in the middle of the width of the page.

After a book form has been locked up, it should be tested for squareness with a square. Forms are liable to get twisted or bowed in locking up, especially if the chase is weak. This defect can usually be remedied by loosening the quoins on one side and tightening them on the opposite side.

MARGINS.

The proper allowances for head and back margins are matters of judgment and preference to a great degree.

The head and foot margins of a *trimmed* book are usually of equal proportions, but, as the binder will almost invariably find it necessary to cut off more paper from the foot than from the head, the make-up must make sufficient allowance for this extra trim.

When the pages have running heads one-third or less shorter than the width of the page, one-half of the space occupied by the running head should be thrown into the head margin, because the white around the running head is to be considered as part of the head margin. If a folio only is used over a page, the head margin is to be calculated from the top line of the page.

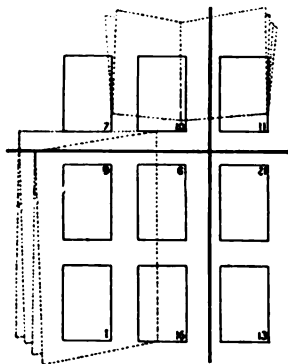

The make-up must know whether a book is to be wire-stitched through the back or sewed through the fold. If wire-stitched through the back, an extra allowance *additional* to the back margin required must be made a little in excess of the space used by the wire. This space varies according to thickness of the book, but is rarely less than three-sixteenths of an inch on *each side* of the back margin, or three-eighths of an inch in the back gutters.

In forms of 32 pages or more it is advisable, where it is possible, to impose the pages so that the sheet may be cut and folded in signatures of half the number of pages, especially when the paper is heavy; but if the form is imposed to fold as one complete signature then it is advisable to deduct enough from the back margin of the inner sections to equal the extra space taken up by the fold of the outside sections.

In imposing forms of 12 or 24 pages, great care must be taken to get the foot and head margins of the inset to be folded in exactly right, and the head and foot margins in such forms should be as evenly divided as possible. More accurate register is obtained when the inset is cut off and folded separately.

TESTING MARGINS.

After the proper head and back margins have been decided on, and the pages arranged to conform to them, the form should be tested to ascertain, if the foot and front margins are correct. The method is illustrated in the accompanying diagram of a section of a 16-page form. Fold a sheet to quarter of the size of the untrimmed paper to be used. The distance from the foot of page 16 to the foot of page 10 must agree with the length of the quarter sheet (as indicated by a dotted line), and the distance from the back edge of page 7 to the back edge of page 11 must correspond with the width of the quarter sheet. This test can be made just as well by using a measuring rule or tape, in which case, if the quarter sheet were twelve inches wide by eighteen inches long, the distance from the front edge of page 12 to the front edge of page 8 must be exactly twelve inches, and the distance from the foot of page 7 to the foot of page 1 must be exactly eighteen inches.

GRIPPER MARGINS.

As applied to book forms, the space between the type and the outer edge of the chase at the gripper side is the gripper margin. A gauge showing the gripper margin of each press should be obtained from the pressman. When the paper is placed in its correct position on the type form the distance between the edge of the paper and the edge of chase should be at least half an inch less than the gripper margin, to permit the pressman to move his form into a suitable place. To make a proper allowance for gripper margin, it is often necessary to place more furniture in the foot margins on the side of the long cross-bar next the gripper than on the other side. The lowest folio of a form should be placed next the gripper edge.

CORRECT IMPOSITION OF LENGTHWISE CUTS AND TABLES.

The correct rule is that lengthwise tables and cuts shall always read from the foot of page. When a lengthwise cut or table is on one page and the explanatory or descriptive matter on the opposite page, then the cut or table should, if possible, be placed on the page with the even folio.

TESTS OF CORRECT IMPOSITION.

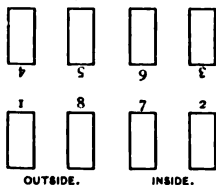

As a general rule, except where for convenience in folding, certain forms are imposed from the center, the lowest (first) folio of a form is placed on the lower left-hand corner. All odd folios are always at the left-hand of the make-up, as viewed from the foot.

The odd and even folios of pages which are side by side in a correctly imposed regular form will, when added together, form a total of one more than the number of pages in a signature. The first and last pages of a signature are always placed side by side—as, for instance, in a 16-page form, where folios 1 and 16 equal seventeen.

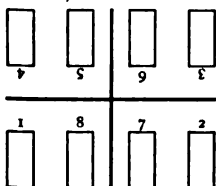

PRESS POINTS.

These are used in forms that are imposed for books, the sections of which are folded by machines. In 16-page forms these points are usually placed exactly 15 inches apart—7½ inches each way from the center of the first fold. The sheets are fed into the folding machine by the point holes to insure register, and the points should be placed exactly in accordance with the instructions of the bookbinder.

SIXTEEN PAGES, IN TWO FORMS.

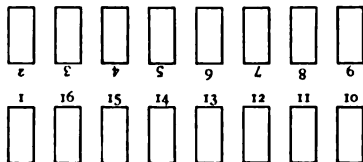

BROAD EIGHTS. IN TWO FORMS.

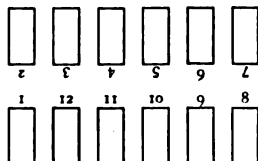

IMPOSITION OF FOLDERS.

The margins of folders are usually equal all around each page, and consequently accuracy in make-up and imposition is necessary. When the sheet is to be backed, turn it the broad way, toward the folio 2. Before printing, paper should be trimmed.

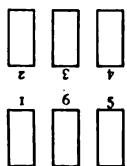

SIXTEEN-PAGE FOLDER.

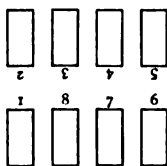

TWELVE-PAGE FOLDER.

SIX-PAGE FOLDER.

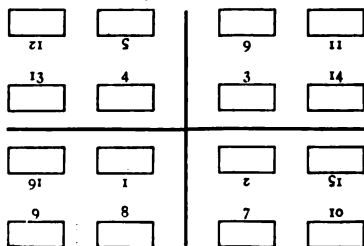

EIGHT-PAGE FOLDER.

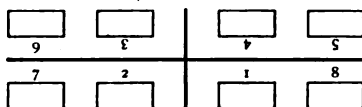

FORMS IMPOSED FROM THE CENTER.

This method of imposition is preferable in forms containing title page, copyright notice and other introductory pages with very little matter in them, as it brings the full pages outside, where they serve as bearers and often prevent slurring.

TWELVE PAGES, BROAD WAY.

In this form pages 3, 4, 9 and 10 are folded in. May frequently be used to advantage on booklets and catalogues.

11	8	6	10	7	12
3	5	4	9	2	1

TWELVE PAGES, DEEP WAY.

This method is convenient only for deep pages, such as an odd-sized booklet, and the same size of paper used on the two regular forms for twelve pages may be used. Paper should be trimmed.

2	11	01	5	9	7
1	12	9	4	5	8

TWELVE PAGES, WITH OFF-CUT.

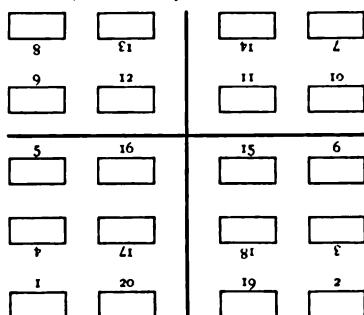

9	7	8	5
4	6	01	5
1	12	11	2

EIGHTEEN PAGES, WITHOUT TRANSPOSITION

3	16	9	10	15	4
1	18	7	8	17	2

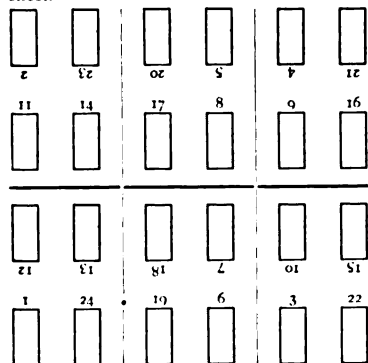

TWENTY PAGES.

Printed on double demy or double royal. This method makes a square page, suitable for booklets, where oddity is looked for.

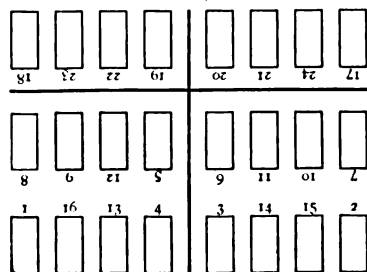

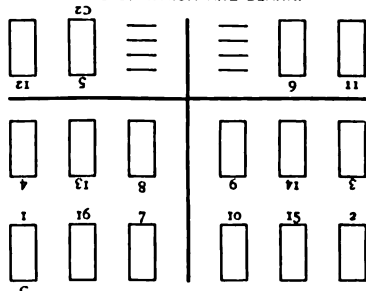

TWENTY-FOUR PAGES, DEEP WAY.

A very satisfactory form, in common use for pamphlets. Careful division of the margins is necessary, the pressman allotting the exact margin to the edge of the sheet to be folded in. Points placed as shown will assist the binder, and should be removed before backing the sheet.

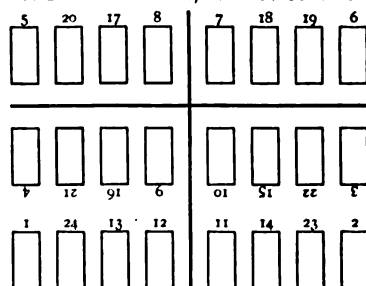

TWENTY-FOUR PAGES, WITHOUT INSET.

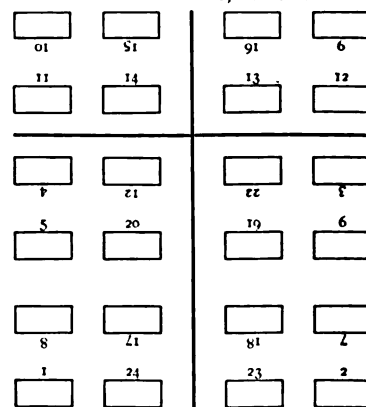

EIGHTEEN PAGES,
TWO OF WHICH ARE BLANK.

When the first side is worked off, transpose pages 7 and 10 in place of 9 and 8, and pages 9 and 8 in place of 7 and 10.

TWENTY-FOUR PAGES, WITHOUT CUTTING.

TWENTY-FOUR PAGES, BROAD WAY

THIRTY-TWO PAGES, WITH TWO SIGNATURES.

18	11	10	61	20	22	23	17
23	26	27	22	21	28	25	24

4	33	28	9	16	13
1	36	25	12	13	24
C					

FORTY PAGES, WITH TWO SIGNATURES.

The larger signature folds same as a 32-page form. The smaller signature is an inset.

19	22	23	18	17	24	21	20
				A1*			
21	22	23	24	25	26	27	28
5	36	37	4	3	38	35	6
8	33	34	1	2	35	32	7
9	32	25	16	15	26	31	10

FORTY PAGES, ONE SIGNATURE.

The paper must be trimmed at ends before printing. A point should be placed where shown, about $\frac{1}{32}$ inch from the fold, encroaching on main section of form—the pressman to deduct this space from the edge of sheet, which is folded toward the form. The division of margin must be accurate, especially at head and foot of pages.

18	22	23	3	4	37	24	17
13	28	33	8	7	34	27	14

Machine Composition Customs

The following rates and rules for machine composition in New York City, have been agreed upon by the Machine Composition Association, the Association of Employing Printers, and the Master Printers' Association.

All prices and rules apply to both Linotype and Monotype Composition except where otherwise specified.

TIME WORK.

Linotype machine time work, \$2.25 per hour.

Monotype machine time work, \$3.00 per keyboard hour.

Minimum charge for any job (linotype) \$1.00 (this does not apply to corrections).

Time rates will be charged on the following:

Author's corrections.

Type larger than 12 point (linotype).

Jobs of less than 10,000 ems (linotype).

Intricate matter not covered by piece rates (linotype).

Matter containing ditto marks (linotype).

PIECE RATES.

Piece rates are minimum and apply only to straight matter from clean legible copy, fully prepared, on sheets of convenient size for the operator to handle.

"Straight Matter" is matter in ordinary English, set in fairly long lines, in one size and face of type, in ordinary paragraphs.

Piece rates include one proof reading and corrections, but without responsibility for errors.

Minimum line measure 20 ems of the type in which job is set, an en or more counts an em.

Leaded matter measured as solid.

LINOTYPE.

For 10,000 ems or over:

6 and 8 point.....	\$.50
10 point, less than 50,000 ems.....	.60
10 point, more than 50,000 ems.....	.55
11 point, law and novel.....	.55
11 and 12 point, other than law and novel work, measured as 10 point.	
Typewriter, 8 point.....	.90
Typewriter, 10 point.....	1.10

Less than 10,000 ems, piece work, 75c. in addition to regular rate; minimum charge, \$1.00.

Cheltenham and other skinny faces will be measured two points smaller than the body.

MONOTYPE.

1,000 ems or less.....	\$1.75
1,000 to 2,000 ems.....	2.25
2,000 to 3,000 ems.....	2.75
3,000 to 3,800 ems.....	3.25
Over 3,800 ems, per thousand.....	.85

11 and 12 point will be measured and charged as 10 point.

14 and 18 point machine composition, 5 cents per square inch.

Typewriter, \$1.10 per thousand ems, measured according to face.

Tabular Matter, \$1.70 or more per thousand ems, according to class of matter.

Different sizes and different measures in the same job (except in made-up matter) will be charged as separate jobs.

Changing matrix cases for any combination not standard, 50c. extra.

PRICE AND ONE-HALF—LINOTYPE.

Matter set over 30 picas wide.

Leader work with one justification.

Jobs in all italic or black face.

DOUBLE PRICE—LINOTYPE.

Centered lines.

Counted lines to run around cuts, and measured full length.

Lines containing Italic, Small Caps or Bold Face.

Jobs in all caps.

Leader work with two justifications.

EXTRA CHARGES—PIECE WORK.

On piece work jobs, an extra charge will be made on the following:

For copy not legible or fully prepared.

For copy requiring extra care in handling, on large sheets, or written on both sides of the sheet, in books or any unusual or inconvenient form.

For matter containing a large proportion of figures, names or technical matter.

For extra proof reading.

For foreign languages.

For five or five and one-half point set over 20 picas wide (linotype only).

For matter set over 60 picas wide, 10c. per thousand ems extra (monotype).

For assembling on galleys two or more faces, heads, etc.

"Rush" jobs are very expensive to machine composition firms, and for such work an extra charge must be made.

METAL.

All metal will be sold and billed with the composition at 20c. per pound.

Metal returned within 30 days will be credited at the rate billed.

Metal held more than 30 days will be accepted only at a rate mutually agreed upon.

Monotype matter 14 to 36 point, or when sold made up, must be returned in standing form (not pied) to receive full credit.

The Remedy for Static Electricity

Pat. Dec. 15, 1914

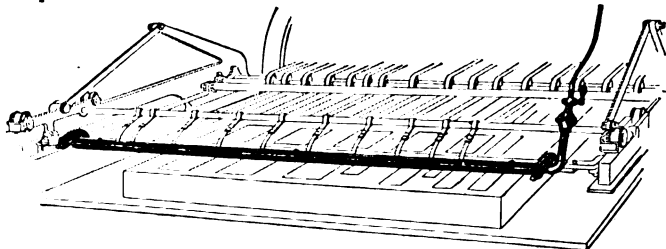

In printing paper is now universally recognized to be *The Thompson Static Neutralizer*, which accomplishes its object in a simple, scientific manner.

Installed on trial—Results guaranteed

The Offset Eliminator

(Gas or Electric)

☐ Is another pressroom necessity. ☐ It dries the ink and prevents offset. ☐ Saves slip-sheeting and spoilage. ☐ Used by every high grade pressroom in Chicago and elsewhere. ☐ Only one genuine—the “Kay-Kay Dispeller” trademark. Infringers will be prosecuted.

The Fly Link

Patent Pending.

Is a natural and positive cure for troubles in flying sheets into the jogger. It lays the sheets down evenly and prevents corners turning over. Thousands in use and giving satisfaction. Sent on trial and guaranteed.
